Brand Manifesto
品牌宣言

源自对极致睡眠体验的不懈追求，H.H.Y 专注打造全球顶奢手工床垫。精选来自世界各地的珍稀天然材料，包括西伯利亚马尾毛、澳大利亚羊毛、阿拉善驼绒、黄金蚕丝、长绒棉等，结合传承百年手工工艺与现代科技，每一款床垫皆为睡眠艺术臻品。我们坚信，优质睡眠是奢华生活的基石，而一张完美的床垫，则是通往甜美梦乡的钥匙。

H.H.Y　拥有5000多平方米的睡眠美学体验馆，为用户提供全方位、沉浸式的奢华睡眠体验，近百款顶奢手工床垫，专业一对一导购服务，让每位用户均可在这里获得身心疗愈的非凡之旅。

H.H.Y　秉承健康可持续的生活理念，追求卓越与创新，不断探索自然力量与人体睡眠的奥秘，力求为每一位用户量身定制最合适的睡眠解决方案，让更多人可以在睡眠中享受无与伦比的舒适与放松。

这不仅仅是一件家具，更是一种文化，一段历史，一个关于自然与梦想的故事。

心之所向，步履不停，H.H.Y　顶奢手工床垫是追求极致生活的梦想之选。

Dear Tian
Please find enclosed your radiocarbon (C14) report for the material recently submitted. The result is reported as "% Biobased Carbon". This indicates the percentage carbon from "natural" (plant or animal by-product) sources versus "synthetic" (petrochemical) sources. For reference, 100 % Biobased Carbon indicates that a material is entirely sourced from plants or animal by-products and 0 % Biobased Carbon indicates that a material did not contain any carbon from plants or animal by-products. A value in between represents a mixture of natural and fossil sources.
The analytical measurement is cited as "percent modern carbon (pMC)". This is the percentage of C14 measured in the sample relative to a modern reference standard (NIST 4990C). The % Biobased Carbon content is calculated from pMC by applying a small adjustment factor for C14 in carbon dioxide in air today. It is important to note is that all internationally recognized standards using C14 assume that the plant or biomass feedstocks were obtained from natural environments.
Reported results are accredited to ISO/IEC 17025:2017 Testing Accreditation PJLA #59425 standards and all chemistry was performed here in our laboratory and counted in our own accelerators in Miami, Florida.
The international standard method utilized for this analysis is cited under Summary of Results. The standard version used is the latest available as of the date reported (unless otherwise noted). The report also indicates if the result is relative to total carbon (TC) or only total organic carbon (TOC). When interpreting the results, please consider any communications you may have had with us regarding the analysis. If you have any questions please contact us. We welcome your inquiries.
Sincerely,
Ronald E. Hatfield President

Summary of Results - % Biobased Carbon Content
ASTM D6866-21 Method B (AMS)
Certificate Number: 51148052611127573
Validation:
Submitter: Senlin Tian
Company: Yangzhou Enker Hair Products
Date Received: March 22, 2022
Date Reported: April 03, 2022
Submitter Label: horse hair sheet / (USDA Applicatoin# 10752)
RESULT: 95 % Biobased Carbon Content (as a fraction of total organic carbon)
Laboratory Number: Beta-622611
Percent modern carbon (pMC): 94.53 +/- 0.27 pMC
Atmospheric adjustment factor (AEF): 100.0; = pMC/1.000
horse hairsheet per USDA
Package received - labeling OOC
View of content
3095.9mg analyzed (5mm x 5mm scale)
Disclosures: All work was done at Beta Analytic in its own chemistry lab and AMSs. No subcontractors were used. Beta's chemistry laboratory and AMS do not react or measure artificial C 14 used in biomedical and environmental AMS studies. Beta is a C14 tracer-free facility. Validating quality assurance is verified with a Quality Assurance report posted separately to the web library containing the PDF downloadable copy of this report.
Precision on the RESULT is cited as +/- 3% (absolute). The cited precision on the analytical measure (pMC) is 1 sigma (1 relative standard deviation). The reported result only applies to the analyzed material. The accuracy of the RESULT relies on the measured carbon in the analyzed material having been in recent equilibrium with CO2 in the air and/or from fossil carbon (more than 40,000 years old) such as petroleum or coal. The RESULT only applies to relative carbon content, not to relative mass content. The RESULT is calculated by adjusting pMC by the applicable "Atmospheric adjustment factor (AEF)" cited in this report

Quality Assurance Report
This report provides the results of reference materials used to validate radiocarbon analyses prior to reporting. Known-value reference materials were analyzed quasi-simultaneously with the unknowns. Results are reported as expected values vs measured values. Reported values are calculated relative to NIST/SRM-19600 and corrected for isotopic fractionation. Results are reported using the direct analytical measure percent modern carbon (pMC) with one relative standard deviation. Agreement between expected and measured values is taken as being within 2 sigma agreement (error x 2) to account for total laboratory error.
Report Date: April 04, 2022
Submitter: Senlin Tian

使用最好的原材料，
和技艺精湛
我们最懂你，
精心制作每一张手工床垫。

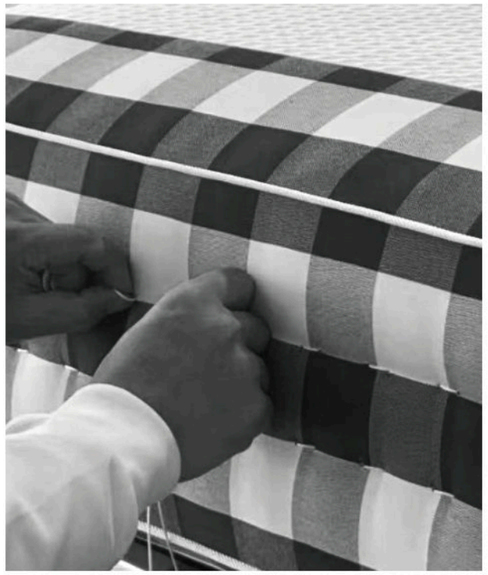

Our Luxury Handmade Mattress

Spring Nesting
A Tailored Support System

01 在每个　　床垫内，我们手工安装单层、双层或三层蜂窝嵌套的棉布袋装弹簧。这不是一项新发明——众所周知，这种结构是自然界中最坚固、最有弹性的结构，因此在铺床中使用这种网格是有意义的。为了确保每个袋装弹簧都能独立工作，我们经验丰富的技术人员会小心地将每个袋装弹簧装入棉质印花布口袋。然后，这些弹簧被巧妙地手工嵌套在蜂窝状图案中，使单个弹簧能够根据你的身体压缩和膨胀，在你睡觉时从头到脚支撑你。

01 与大批量生产的床垫不同，我们标志性的侧缝都是手工完成的，这是一种复杂的劳动密集型技术，需要花很多时间才能掌握。作为我们核心DNA的重要组成部分，这一过程是每个　　的质量和舒适度的组成部分，并保证了我们以30年的保修而闻名。

Side Stitching
A Labour of Love

Sealed with Care
Belgian Damask

01 H.H.Y 严选全球顶级天然马尾毛，每一缕都历经物理清洁与手工梳理，完整保留纤维中空结构的原生弹性与透气基因。正是这份不被破坏的天然肌理，让纤维得以自然蓬松，构建起床垫内部的天然空气循环系统。这一结构赋予了产品恒温控湿、整夜干爽、持久回弹的核心优势，真正实现冬暖夏凉、四季安睡的极致体验。

01 我们车间的熟练技术人员非常小心地完成每一张H.H.Y 床垫的收尾工序。使用一种坚固但灵活的封边胶带，通过一台特殊的缝纫机将侧边与顶板精密连接。这套细致严谨的密封工艺，能确保床垫表面平滑流畅，没有粗糙的织物边缘。它不仅是美观的装饰，更能有效保护内部结构，赋予床垫经久耐看的质感与耐用性。

Tape Edging
Structural Security

Hand Tufted
Contoured for Comfort

01 在H.H.Y，每一张床垫都由匠人手工梳理绒毛。这些绒毛均匀铺展在床垫全域，牢牢固定填充物，精准把控的绒毛长度，造就了H.H.Y标志性的迷人轮廓。手工簇绒工艺不仅从根源保障使用安全，更能支撑长达三十年乃至更久的舒适睡眠体验。

01 睡眠是舒适体验少不了无微不至的售后服务，H.H.Y离不开无微不至的售后服务。H.H.Y 秉承“服务至上，尊贵售后”的宗旨，务求让每一位主人都享受到皇室般的服务。

As a bedding material, there are few materials that can rival horsetail hair. Each curled ponytail hair is like a miniature spring, which can increase the elasticity of the internal spring system, providing good support and flexibility. The ponytail itself also has a built-in high-efficiency ventilation system.

It is worth mentioning that horsetail is an organic material with natural antibacterial, antifungal, and anti mite properties, which helps to create a healthy and hygienic sleeping environment.

Each strand of ponytail hair is like a miniature air duct: a hollow tube with capillary action that can expel moisture and allow fresh air to enter. Ponytail hair can efficiently remove moisture. If you immerse the ponytail hair in water and then take it out and shake it a few times, it can instantly restore dryness. The Histen bedding is equipped with millions of natural micro bullets, which provide comfort and help you eliminate excess heat and moisture during sleep. Therefore, you can fall asleep faster at a comfortable temperature, enjoy continuous deep sleep, and fully restore energy. This will greatly improve your sleep quality.

Natural Fillings Tenderly Teased

Horsetail 马尾毛

01 作为床具用料，鲜少有材料可以媲美马尾毛。每束卷曲的马尾毛都如微型弹簧一般，可提高内部弹簧系统的弹力，提供良好的支撑力和柔韧性。马尾毛本身还内置高效通风系统。

02 值得一提的是，马尾毛是一种具有天然抗菌、抗真菌和抗螨特性的有机材料，有助于营造健康卫生的睡眠环境。

03 每束马尾毛都如同一个微型风道:一个具有毛细现象的中空管，可排出湿气，透进清新空气。马尾毛可以高效排湿，如果将马尾毛浸入水中，然后拿出甩动几下，可即刻恢复干燥海丝腾床具内装设数以百万计的天然微型弹，带来舒适受的同时还能助您在熟睡过程中排出多余热量和湿气。因此您可以在舒适的温度下更快入睡，尽享持续的深度睡眠，充分恢复精力。这将极大改善您的睡眠质量。

Fehérló

梦驰系列

H-3

Size: 200*220*35

Feature:

- 浅紫色银线白色菱形面料
- 桑蚕丝・羊毛
- 驼绒・羊驼绒・马尾毛
- 棉布迷你弹簧•三层棉布独立袋装弹簧

H-3 顶垫

Size: 200*220*13

Feature:

- 浅紫色银线面料
- 羊毛・马尾毛・驼绒
- 棉布迷你弹簧

H-3 高端平面架

Size: 200*220*30

Feature:

- 面料：纯棉格子面料 + 铜丝面料编织工艺
- 填充物系统：黄麻毡
- 木架系统：多层实木板 + 落地松木
- 其他系统：3分实心肽金脚

H-3 床头

Size: 378.5*236*153

Feature:

- 头层进口纳帕青皮刺绣工艺
- 纯贝壳拼接工艺
- 银色包角 + 银色铜钉 + 铜丝面料

"Fehérló"在匈牙利语中意为"白马"，它象征着力量、速度、纯净、自由和高贵，同时代表着超脱和启示，引领着英雄们穿越未知的迷雾，朝着光明与智慧前进。象征着人类对于更高境界的追求与探索。

Feature:

- 绿色格子面料
- 马尾毛
- 羊毛
- 棉花

"Turadh" 源自古来而美丽的苏格兰盖尔语，描绘一种特殊的天气现象—在阴雨连绵之间，阳光突然间穿透厚厚的云层，照亮大地的瞬间，这束让人期待的光明，带来不期之尉藉和希望。

Camel wool is collected from the unique double humped camels in the Alxa region. Alxa is a top camel wool production area in the world, and the quality of camel wool produced is extremely high. Although the production is only 1% of top cashmere, its warmth and comfort are unmatched by cashmere.

Camel hair comes from the belly camel hair, and a camel can only produce 0.3 kilograms of fluff, which is internationally recognized as having the title of "soft gold". Camel wool has strong moisture absorption, moisture resistance, heat resistance, wear resistance, warmth retention, anti-static and other effects, and is known as an excellent "temperature regulator".

Natural Fillings
Tenderly Teased

Camel hair
驼绒

01 骆驼绒采集自阿拉善地区特有的双峰骆驼，阿拉善是全球顶级的驼绒产区，出产的驼绒品质极高，虽然产量只有顶级羊绒的1%，但它的保暖性和舒适性却是羊绒无法比拟的。

02 驼绒来自腹部驼毛之中，一峰骆驼仅能产生0.3 公斤的绒毛，被国际公认为具有“软黄金”称号。驼绒具有极强的吸湿、防潮、阻热、耐磨、保暖、抗静电等功效，被称为卓越的 “温度调节器”。

'Yakamoz'源自土耳其语，意思是"月亮在水中的倒影"。曾被德国对外关系研究所《文化交流》杂志评选为"世界最美单词"。在'Yakamoz'短暂而璀璨的时刻，月光洒在宁静的海面上，海水在生物的发光中闪烁，仿佛无数星星跌落海中，编织成一幅夜海星沙的画卷，此时，大自然无言的诉说着"她"的故事，海里的银河在歌唱，整个宇宙都在与我们对话。

Natural Fillings
Tenderly Teased

Wool
羊毛

Wool is another wonderful gift from nature, perfect for pairing with horsetail and cotton as a high-performance material. Pure wool helps ensure that the bedding maintains an appropriate temperature, just like having built-in temperature control. As early as ancient times, people had already understood the magical properties of wool, which brought warmth when it was cold and transported coolness when it was hot. Keep you dry and comfortable during sleep.

The history of wool can be traced back several dry years. The Babylonians and Egyptians used wool to weave objects. In Sweden, the oldest woolen fabric can be traced back to the Bronze Age, approximately 3000 years ago. At that time, people not only used wool spinning to make clothes, but also made bedding. From ancient times to the present, wool has always been an ideal material for making bedding and clothing due to its excellent insulation properties. We use wool, cotton, and ponytail wool as fillers and combine them through precise calculations to create extraordinary bedding with temperature control characteristics and natural elasticity.

Wool fibers have a spring like complex structure and textured surface, which can be improved and optimized to provide thermal protection. The unique cellular structure of wool is completely different from other smooth synthetic fibers.

The structure of wool fibers allows a large amount of air to circulate between the fibers, giving this material good natural insulation, flexibility, and elasticity. Wool can absorb up to 30% of its own weight of moisture without making people feel damp. The small pores allow moisture to pass through the wool fibers, ensuring a comfortable experience throughout the year, whether it's hot summer or cold winter nights. Enjoy sleep every day.

01 羊毛可谓大自然的另一种奇妙馈赠，非常适合与马尾毛和棉搭配使用是一种性能出众的材料。纯羊毛有助于确保床具保持适当温度，如同自带温控一般。远在古代，人们就已了解羊毛的神奇特性,天冷时带来温暖，天热时输送清凉。令您在睡眠时保持干爽，维持适宜温度。

02 羊毛的历史可追溯到数千年前。古巴比伦人和埃及人曾使用羊毛编织物品。在瑞典，最久远的羊毛编织物可追溯到青铜时代，也就是大约 3000 年前。那时人们不仅用羊毛纺纱做衣物，还做床上用品。从古至今羊毛凭借优异的保暖特性，始终是制作床上用品和衣物的理想材质。我们将羊毛、棉和马尾毛用作填充物，通过精确计算加以组合使用，从而打造出具有温控特性与天然弹性的不凡床具。

03 羊毛纤维拥有弹簧般的复杂结构和纹理表面，经过改良优化可提供热保护。羊毛独特的细胞结构与其他顺滑的合成纤维截然不同。

04 羊毛纤维的结构允许大量空气在纤维间流通，从而让这种材料具备良好的天然隔热性、柔韧性和弹性。羊毛可吸收的水分，高达自重的 30%，却不会让人感觉潮湿。细小的毛孔让水分得以穿过羊毛纤维，从而确保一年四季，无论是酷暑炎夏还是寒冷冬夜都能给人们带来舒适体验。享受睡眠每一天。

Feature:
- 银灰色格子纯棉面料
- 羊毛
- 马尾毛

Pine wood is as solid as a rock, and Swedish pine wood is our raw material. It grows slowly and is very sturdy. Pine wood endows the bedding with a strong and stable superior quality, allowing you to use it with confidence. The reason why our bedding is hard and stable is because of its wooden frame, which is made of sturdy pine trees selected from the forests of northern Sweden. Due to their slow growth, these pine trees are even more sturdy and sturdy.

always remember our quality and environmental responsibility. We love nature and pay great attention to the growth status of each pine tree and the renewability of the forest. All wooden frames of the bedding and headboard are FSC certified, which means that these woods can be traced and the harvesting method of these pine woods is beneficial for protecting the biodiversity, productivity, and ecological processes of the forest. We offer a 25 year warranty for all bed frames.

Pine 松木

01 松木坚如磐石，瑞典松木是我们的原材料，生长缓慢且非常坚固。松木赋予床具结实稳固的优越品质，让您可以放心使用。我们的床具之所以坚硬稳固，原因在于其木框架，精选产自瑞典北部森林的坚固松树打造床具框架，由于这些松树生长缓慢，因此更加结实坚固。

02 始终铭记品质和环境责任，我们热爱自然，十分关注每棵松树的成长状况和森林的可再生性。床具和床头板的所有木框架均经过 FSC 认证，这意味着这些木材均可追溯而且这些松木的采伐方式有利于保护森林的生物多样性、多产性和生态过程。我们为所有床具框架提供 25 年质保。

Aliferous
云霓之翼系列

"Aliferous"是一个源自拉丁语的英语形容词。它象征着自由也代表着庇护，它是每一个不曾放弃的梦想与希望，也是经历成长后幻化出来的奖赏。因此，每一次飞翔，不只是为了天空，更是为了心灵的深处，为了那片最真实的自我。

Cotton may be the softest and most comfortable gift from nature to mankind. The cotton selected by [redacted] is soft, comfortable and very breathable, allowing the air around the body to circulate smoothly, allowing you to always keep your body dry and comfortable in a healthy sleeping environment, thereby helping you fall asleep faster and extending your deep sleep time.

Ventilate and enjoy a more comfortable sleep. In addition to the lungs, the skin also breathes. There are more than 7 million respiratory pores on the body surface, which are responsible for expelling toxins from the body. To keep you dry and comfortable, your bed must have breathable properties to allow air to circulate around your body.

The difference between cotton and non-porous materials:

You may have noticed that on hot summer days, cotton shirts feel much cooler and keep you drier than synthetic clothing. This is because cotton is breathable and absorbs sweat and moisture. The sweat you produce at night is 98% water. Therefore, you need to use beds and bedding with breathable properties to allow sweat to evaporate quickly while sleeping. Non-porous synthetic materials such as rubber and polyether do not have any breathable properties. Non-porous materials cannot wick away moisture, which means that most of the sweat from the body will remain in the bed, and the warm and moist environment can easily breed mites.

Cotton 棉花

01 棉花可能是大自然赠予人类的最为柔软、舒适的佳礼。 选用的棉花柔软舒适且非常透气，能让身体周围的空气顺畅流通，让您能在健康的睡眠环境中始终保持身体干燥、舒适，从而助您更快入睡，同时延长深度睡眠时间。

02 通风透气，享受更舒爽的睡眠除肺外，皮肤也会呼吸。体表有 700多万呼吸毛孔，负责将毒素排出体外。为保持干燥舒适，床具必须具有透气特性，令身体周围的空气能够顺畅流通。

03 您可能已经注意到了，在炎热夏日，棉衬衫与合成材质衣物相比，穿起来会感觉凉爽得多而且还能保持身体干燥。这是因为棉通风透气，可吸收汗液和湿气。在夜间您流出的汗液中98%是水分。因此，您需要使用具有透气特性的床具和床上用品，便于睡觉时汗液快速蒸发，橡胶、聚醚等无孔合成材料不具有任何透气特性。无孔材料无法排湿，这意味着体内排出的大部分汗液会留在床内，而温暖潮湿的环境很容易滋生螨虫。

Hera
赫拉系列

V-6A

Size： 180*200*28

Feature：

- 羊毛碎花面料
- 驼绒
- 羊毛
- 棉花
